relation between a class pdf

In mathematics, a binary relation on a set A is a set of ordered pairs of elements of A . In other words, it is a subset of the Cartesian product $A \times A$. More generally, a binary relation between two sets A and B is a subset of $A \times B$. The terms correspondence, dyadic relation and 2-place relation are synonyms for binary relation.. An example is the "divides" relation between the set of ...

A spatial relation, specifies how some object is located in space in relation to some reference object. When the reference object is much bigger than the object to locate, the latter is often represented by a point. The reference object is often represented by a bounding box.. In Anatomy it might be the case that a spatial relation is not fully applicable.
