Reliability engineering is a sub-discipline of systems engineering that emphasizes dependability in the lifecycle management of a product. Dependability, or reliability, describes the ability of a system or component to function under stated conditions for a specified period of time. Reliability is closely related to availability, which is typically described as the ability of a component or ...

A high reliability organization (HRO) is an organization that has succeeded in avoiding catastrophes in an environment where normal accidents can be expected due to risk factors and complexity.. Important case studies in HRO research include both studies of disasters (e.g., Three Mile Island nuclear incident, the Challenger explosion and Columbia explosion, the Bhopal chemical leak, the ...
