

representing modeling and visualizing pdf

In 3D computer graphics, 3D modeling is the process of developing a mathematical representation of any surface of an object (either inanimate or living) in three dimensions via specialized software. The product is called a 3D model. Someone who works with 3D models may be referred to as a 3D artist. It can be displayed as a two-dimensional image through a process called 3D rendering or used in a ...

Visualizing Microservices: Designing a Microservice System

A data model (or datamodel) is an abstract model that organizes elements of data and standardizes how they relate to one another and to properties of the real world entities. For instance, a data model may specify that the data element representing a car be composed of a number of other elements which, in turn, represent the color and size of the car and define its owner.

Data model - Wikipedia

The downward-sloping yellow line is a demand curve, and the upward-sloping green line is a supply curve. Hopefully that seems familiar. However, we're in a bit of a mirror universe, because we are graphing the supply and demand of expenditure. So the "expenditure suppliers", represented by the green curve, are economic consumers.

1. Introduction. Big data is widely recognized as referring to the very large amounts of data, both structured and unstructured, that organizations are now capable of capturing and attempting to analyze in a meaningful way so that data-driven decision analysis and actionable insights can be obtained.
