Low-Power Sub-1 GHz RF Transceiver - Texas Instruments

An RF module (radio frequency module) is a (usually) small electronic device used to transmit and/or receive radio signals between two devices. In an embedded system it is often desirable to communicate with another device wirelessly. This wireless communication may be accomplished through optical communication or through radio frequency (RF) communication.

Simplifying LTE Advanced multiband RF complexity. The Qualcomm RF Front End solution is designed to support carrier aggregation with the flexibility needed for even the most complex RF band configurations required by LTE Advanced.

AN91445 explains antenna design in simple terms and provides guidelines for RF component selection, matching network design, and layout design. This application note also recommends two Cypress-tested PCB antennas that can be implemented at a very low cost for use with the Bluetooth Low Energy (BLE) solutions that are part of Cypress's PSoC[®] and PSoC families.

Besides this page, here is a QRP forum you can look up: QRP - eham.net. QRP sdr transceivers . Sdr transceivers have earlier depended on a pc all the time, which is not so portable. However last year the first qrp sdr transceiver without an always need for pc, SDR Cube, was introduced by Midnight Design Solutions, where one of the designers is also behind the Juma qrp transceivers.
